

Benninghoven Summer Learning 2023

Benninghoven PTA wants to help keep our kid's skills sharp and avoid the "summer slide." Studies show that kids who read and continue to practice math skills over the summer maintain the skills developed during the school year.

Two ways to participate. Pick one that works best for you and your student!

1 - IXL Summer Mastery Challenge

Continue learning with IXL, an app that your Benninghoven student has used throughout the school year. Your teacher has provided login information for you to utilize this app.

Goal: Kindergarten-2nd grade

Master 15 skills in math + Master 15 skills in reading. Mastery is a score of 100.

Goal: 3rd grade -5th grade

Master 20 skills in math + Master 20 skills in reading. Mastery is a score of 100.

What skills can you work on?

Your current grade, plus 1 grade level below and above. For example, a 1st grader can work on K, 1st, and 2nd grade math and reading skills.

How to track?

Mark off a medal each time you master a skill. Teachers will verify the skills completion once turned in.

2 - Learn Your Way Summer Challenge

This option allows you to engage in learning however it works for you. Read books, practice real world math, do summer workbooks, etc.

Goal: Kindergarten-2nd grade

5-10 mins in math + 10-15 min in reading

Goal: 3rd grade -5th grade

10-20 mins in math + 20-30 min in reading

How to track?

It's simple. Each time a student meets a reading and/or math goal (see above) cross off a circle on the tracking sheet. For example, if your incoming 2nd grader reads for 10 minutes and then does subtraction practice, he or she can cross off two circles. At the end of the summer the goal is to have 40 circles crossed off.

Celebrate Learning!

At the start of the 2023-2024 school year, we will host a Summer Learning Celebration along with KC Royals mascot Slugger. This will be for students who complete one of the above options.

Turn in your form to the front office or to your teacher by Friday, August 25, 2023.

All trackers MUST be signed by their parent or guardian.

Any questions about the program should be directed to Courtney Bukovaz at cbukovaz@gmail.com.

Thank you and happy learning!

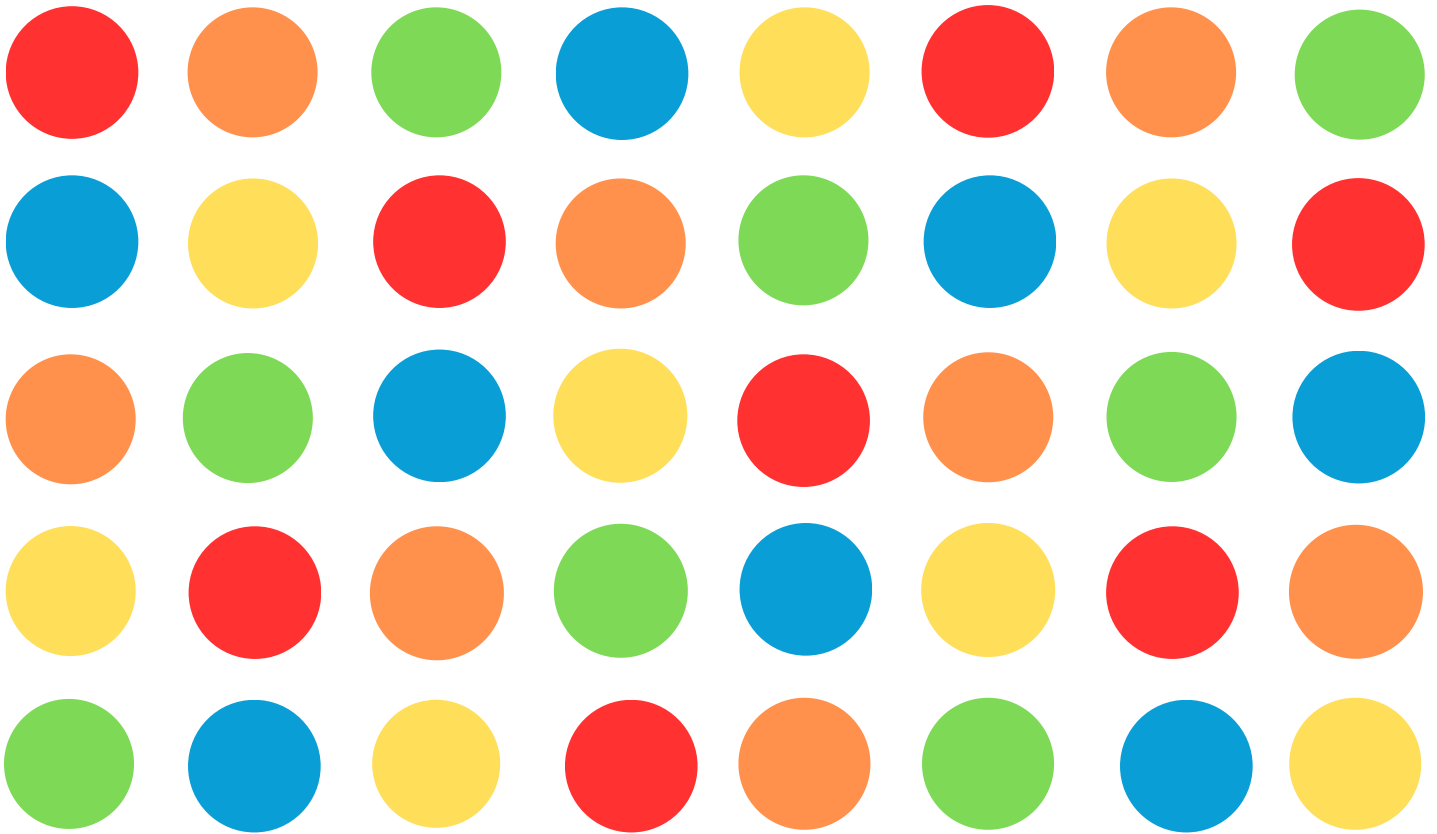

SUMMER LEARNING CELEBRATION

Complete the Summer Learning Program and you will be able to attend the celebration at the beginning of the school year with SLUGGER!!

Reading + Math

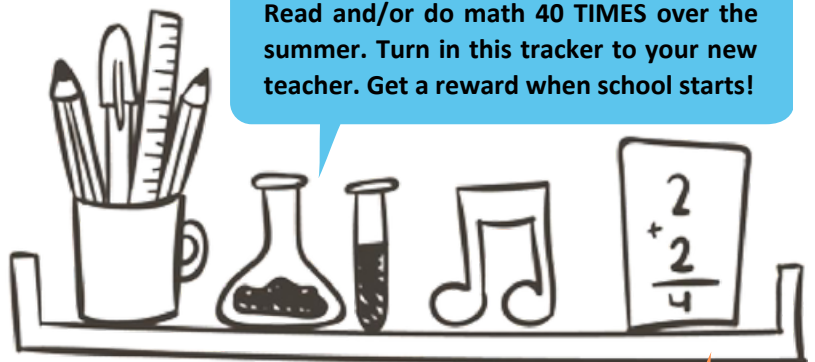

Benninghoven Summer Learning Tracker:

Read a book set in a place you want to visit.
(Australia, Hawaii, the beach, etc.)

Work on fractions and measurements while baking your favorite dessert.

GOAL:
Read and/or do math 40 TIMES over the summer. Turn in this tracker to your new teacher. Get a reward when school starts!

Read about a famous musician, artist, athlete, or scientist.

Review math facts while doing jumping jacks, shooting baskets etc.
